

# **RECEP INTERNAL WORKSHOP ON RUSSIA'S OPENING SATURDAY APRIL 20, 10:00-18:00**

**RECEP seminar room**

This workshop aims at organising internal discussion on the topic which is priority of RECEP this year: the opening of the Russian economy and especially the RF-EU economic integration process. This is connected to sustainable growth. As the research field is very broad, research is divided in several parts conducted so far more or less separately. This is also worth for quantitative research. A moment of coordination is thus needed now, when we have some preliminary results. Moreover, research conducted in other departments, as macroeconomics and State reform, or enterprise restructuring, are connected to the topic and the researchers involved have to enter the overall approach.

**Opening the seminar : Ivan Samson**

**Macroeconomic approaches: qualitative issues**

*What content of CEEA, how to push the concept ?* Ivan Samson, Xavier Greffe
